## SMART LIFT & POWER LIFT •

### Two post lift

---

NUSSBAUM developed in cooperation with Toyota & Lexus modern automotive lifts and testing equipment. The following two post lift have Toyota & Lexus approval:

#### SMART LIFT 2.30 SL

SMART LIFT 2.30 SL with standard lifting arms

- From NUSSBAUM developed and manufactured in Germany electromechanic two post lift
- Electronical synchronization
- Optimal free access to car doors
- Low wear Nylatron-nut
- 5-years warranty on rolled screws and nuts
- Power transmission by multiple v-belt
- Very quiet operation
- Two motors integrated in columns, without base frame
- Telescopic asymmetric lifting arms with low lifting point, 180° swiveling
- Consistently quality controls in all stages of production

#### POWER LIFT SPL 4000 · SPL 4000 UNIVERSAL

POWER LIFT SPL 4000 UNIVERSAL

- From NUSSBAUM developed and manufactured in Germany hydraulic two post lift
  - Additional safety through electromagnetic safety ratchet
  - Safety - stop at top connection
  - No base frame
  - Flexible asymmetric lifting arms
  - Fast lifting and lowering time
  - Low maintenance and wearless cylinder
  - In galvanized version, can be used outdoor and in washing bay (optional: external control unit)
  - Easy handling through stepless controllable speed control panel
  - For lifting from „small passenger car“ up to „light commercial van“ (SPL 4000 UNIVERSAL)
-

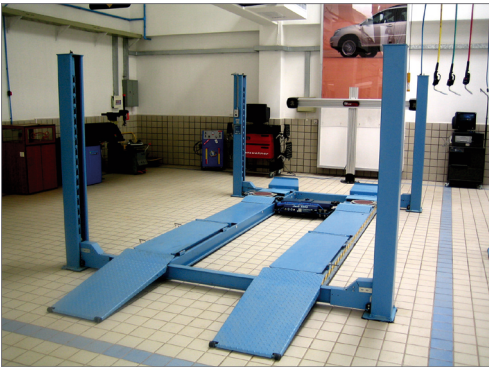

## COMBI LIFT · TOP LIFT ·

Four post lift · In-ground lift

Nussbaum

### COMBI LIFT 4.40 H · 4.40 H WHEEL ALIGNMENT

COMBI LIFT 4.40 H WHEEL ALIGNMENT

- From NUSSBAUM developed and manufactured in Germany hydraulic four post lift
- High-capacity, quiet oil-submerged motor
- Available with wheel alignment set, axle jack, play detector, wheel-free lift
- Accurately adjustable locking bars for precise wheel alignment
- Flat and compact construction
- User friendly and lockable control unit
- Available also in fully galvanized version

### TIO LIFT 2.35 TS STANDARD · TS XY · TTL K SST

TOP LIFT 2.35 TS STANDARD

From NUSSBAUM developed and manufactured in Germany in-ground lift, can be found in all working areas of workshop, thanks its application.

Whether lifting direct reception, maintenance and repair, body work and paint or car care; with the TOP LIFT models you can do these works at the vehicle without any problem.

#### TOP LIFT 2.35 TS STANDARD

The TWO PISTON LIFT suits special for the service and repair works. The lift is perfect for lifting from passenger cars and small commercial vans up to 3,5t. The galvanized lifting platform is lengthwise adjustable.

#### TOP LIFT 2.35 TS XY

The fire galvanized lifting platform of the TOP LIFT 2.35 TS XY is lengthwise and transversally adjustable.

TOP LIFT 2.35 TS XY

#### TOP LIFT 2.35 TTL K SST

The TWO TELESCOPIC PISTON LIFT has no mechanical connection. Its low installation depth is only 1605 mm - ideal for installation in region with high groundwater level. The lift is available with standard lifting arms, which are equipped with adjustable pick up pads.
